

PLUTO 8000 WBX

LEDMOV546

USER MANUAL

1 PRODUCT

1.1 TECHNICAL SPECIFICATIONS

Type	Pluto 8000 WBX
LED colors	19x40W RGLB LED+RGB Ring
Angle	Beam Angle: 3.5°~38°, Field Angle: 6°~60°
Power	720W
Control Protocol	DMX512, RDM, Bluetooth, NFC, W-DMX (Optional)
Voltage Range	AC100~240V,50/60Hz
Input Current	110V/6.5A,220V/3.3A
Protection	IP20
Operation Temperature	0°C~45°C
Dimensions	352x259x424mm
Weight	14KG

DIMENSIONS

1.2 Safety Notes

IMPORTANT

- This product must be installed by a qualified professional.
- To maintain the condition and to ensure safe operation of this fixture, follow the safety instructions and warning notes outlined in this manual.
- The manufacturer will not accept liability for any resulting damage caused by the non-observance of this manual or any unauthorized modification to the device.

CAUTION!

- Make sure that the voltage supplied to the fixture is not higher than stated on the rear panel.
- Do not touch the power cables if your hands are wet.
- The earth wire must always be connected to the ground. It is essential to connect the yellow/green conductor to earth.
- Make sure that the power cord is never crimped or damaged by sharp edges. Check the device and the power cord from time to time. The electrical connection, repairs and servicing of this fixture must be carried out by a qualified person.
- Always disconnect the power input cable to completely remove power from unit when not in use or before cleaning or servicing the fixture.
- Do not switch the fixture on and off in short intervals as this could reduce the fixture's life.
- Do not touch the device's housing with bare hands during its operation, as the housing becomes hot. The surface of the product's casing can reach up to 70° C (158° F) during operation. Avoid contact by persons and materials. Do not install the product in a location where there is a risk of accidental contact. Allow the product to cool for at least 10 minutes before handling.
- When replacing lamps and fuses, use replacements of the same type and rating only.
- Please protect the fixture to avoid damage during transport and installation. If there is any damage to the coating, the shell may be corroded.
- When hanging the fixture, it is necessary to verify that hanging points and hooks can bear at least 10 times the weight of the fixture.
- Fix a safety cable at the correct holes only. Only operate the fixture after having checked that the housing is firmly closed, and all screws are tightly fastened.
- The maximum ambient temperature 45°C must never be exceeded. Do not operate the product if the ambient temperature (Ta) exceeds 45° C (115° F).
- During the initial start-up some smoke may appear, or a smell may be present. This is a normal process and does not necessarily mean that the device is defective.

Electrical Warning

- The light source contained in this luminaire shall only be replaced by the manufacturer, service agent, or a similar qualified person.
- When replacing lamps and fuses, use replacements of the same type and rating only.
- The lens must be replaced when it is obviously damaged, so that the fixture's function is not impaired, e.g., due to cracks or deep scratches!

Keep the product well away from flammable materials

- Keep all combustible materials (e.g., fabric, wood, paper) at least 500 mm (20 in.) away from the product.
- Ensure that there is free and unobstructed airflow around the product. Provide a minimum clearance of 150 mm (6 in.) around fans and air vents.
- Do not illuminate surfaces within 3 m (10 ft.) of the product.
- Do not install a fuse that has a higher rating than the one originally installed in the product. Do not bypass fuses.
- Do not stick filters, masks, or other materials onto optical components.
- If the fixture seems to be abnormally hot, shows signs of melting or emits smoke, disconnect the fixture from power immediately and allow it to cool. Do not touch the fixture without heatproof safety gloves. Keep the fixture well away from combustible and flammable materials.

NEVER LOOK DIRECTLY INTO THE LIGHT SOURCE. THIS IS A RETINA INJURY RISK AND MAY CAUSE BLINDNESS.

Do not point the front of the fixture towards the sun or other strong light sources. The front lens focuses and concentrates light just like a magnifying glass. Strong light can cause internal damage to the fixture, melting components or starting an internal fire within seconds.

To avoid problems from strong light sources:

- Do not expose the front of a fixture to sunlight or any other strong light source. Avoid pointing other high-powered beam lights directly at the fixture.
- Do not focus a light beam from one lighting fixture directly towards another.
- For outdoor applications during daylight, make sure that the front face of any fixture is shielded or points away from the sun, even when not in use.
- Do not expose the product to excess heat (from other lighting fixtures for example).

2 INSTALLATION

2.1 MOUNTING

Truss installation

- ◆ Keep all combustibile materials (e.g., fabric, wood, paper) at least 500 mm (20 in.) away from the product.
- ◆ For overhead use, always install a safety cable that can hold at least 10 times the weight of the fixture.
- ◆ Secure the fixture with a safety cable through the rear safety eye and truss as shown.
- ◆ Ensure that the structure (truss) to which you are attaching the fixture is secure.

2.2 Fuse replacement

- ◆ Remove the safety cap using a screwdriver.
- ◆ Remove the old fuse from the safety cap.
- ◆ Install a new fuse.
- ◆ Replace the safety cap.

2.3 POWER CONNECTIONS

- ◆ This product has an auto-ranging power supply that can work with an input voltage range of 100–240 VAC, 50/60 Hz.

AC Plug

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow/Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

2.4 Data network requirements

- ◆ Connect the DMX512 controller to the units in series. A DMX 512 data link is required to control the fixture via DMX. The fixture has 3/5-pin XLR connectors for DMX data input and output.
- ◆ Each unit has N DMX channels so the DMX Addresses should increase by increments of 1, (Nx1) + 1, (Nx2) + 1, (Nx3) + 1...
- ◆ Any DMX address in the range from 001 to 512 may be used.
- ◆ Connect the DMX-output of the first fixture in the DMX chain with the DMX-input of the next fixture. Always connect one output with the input of the next fixture until all fixtures are connected.
- ◆ Caution: At the last fixture, the DMX-cable should be terminated with a terminator. Solder a 120 Ω resistor between Signal (-) and Signal (+) into a 3/5-pin XLR-plug and plug it in the DMX-output of the last fixture.

2.5 Update software

- ◆ Steps of updating software with USB-C interface:
 1. Insert USB-C U dish into USB-C interface.
 2. After finding "Upgrade Software" in the menu, Find the corresponding software and click OK.

3 FUNCTIONS AND SETTINGS

3.1 DISPLAY OPERATION

- ◆ MENU: Used to access the menu or to return a previous menu option.
- ◆ ENTER: Used to select and store the current menu or confirm the current function value or option within a menu.
- ◆ UP: Navigates upwards through the menu list and increases the numeric value when in a function.
- ◆ DOWN: Navigates downwards through the menu list and decreases the numeric value when in a function.
